Safety Data Sheet

Section 1: Identification

Product identifier

Product Name • RedLam™ Laminated Veneer Lumber (LVL)

Recommended use • Building materials

Details of the supplier of the safety data sheet

Manufacturer • RedBuilt LLC
PO Box 60
Boise, ID 83707
United States
www.RedBuilt.com

Telephone (General) • (208) 364-1200

Emergency telephone number

Manufacturer • (208) 364-1200
Manufacturer • (800) 424-9300 - CHEMTREC

Section 2: Hazard Identification

UN GHS
According to: UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS)

Classification of the substance or mixture

UN GHS • Note: This product is not hazardous in the form in which it is shipped by the manufacturer but may become hazardous by downstream activities (e.g. milling/cutting/sanding) which creates small particles resulting in the potential hazards as described below.
Skin Sensitization 1
Respiratory Sensitization 1
Carcinogenicity 1A
Specific Target Organ Toxicity Repeated Exposure 1

Label elements

UN GHS

DANGER

Hazard statements • May cause an allergic skin reaction
May cause allergy or asthma symptoms or breathing difficulties if inhaled
May cause cancer.
Causes damage to organs through prolonged or repeated exposure.

Precautionary statements

Prevention • Obtain special instructions before use.
Do not handle until all safety precautions have been read and understood. Do not breathe dust. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Contaminated work clothing should not be allowed out of the workplace. Use personal protective equipment as required. In case of inadequate ventilation wear respiratory protection.

Response • IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. Specific treatment, see supplemental first aid information. If skin irritation or rash occurs: Get medical advice/attention. IF exposed or concerned: Get medical advice/attention.

Storage/Disposal • Store locked up. Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Other hazards
UN GHS • May form combustible dust concentrations in air. According to the Globally Harmonized System for Classification and Labeling (GHS) this product is considered hazardous.

United States (US)
According to: OSHA 29 CFR 1910.1200 HCS

Classification of the substance or mixture
OSHA HCS 2012 • Note: This product is not hazardous in the form in which it is shipped by the manufacturer but may become hazardous by downstream activities (e.g. milling/cutting/sanding) which creates small particles resulting in the potential hazards as described below. Skin Sensitization 1 Respiratory Sensitization 1 Carcinogenicity 1A Specific Target Organ Toxicity Repeated Exposure 1 Combustible Dust

Label elements
OSHA HCS 2012

DANGER

Hazard statements • May cause an allergic skin reaction May cause allergy or asthma symptoms or breathing difficulties if inhaled May cause cancer. Causes damage to organs through prolonged or repeated exposure. May form combustible dust concentrations in air.

Precautionary statements
Prevention • Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/protective clothing/eye protection/face protection. In case of inadequate ventilation wear respiratory protection.
Response • IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. IF ON SKIN: Wash with plenty of soap and water. Specific treatment, see supplemental first aid information. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. Get medical advice/attention if you feel unwell. IF exposed or concerned: Get medical advice/attention.

Storage/Disposal • Store locked up. Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Other hazards

Canada
According to: WHMIS

Classification of the substance or mixture
WHMIS • Note: This product is not hazardous in the form in which it is shipped by the manufacturer but may become hazardous by downstream activities (e.g. milling/cutting/sanding) which creates small particles resulting in the potential hazards as described below.
Other Toxic Effects - D2A
Other Toxic Effects - D2B

Label elements
WHMIS

Other hazards
WHMIS • May form combustible dust concentrations in air. In Canada, the product mentioned above is considered hazardous under the Workplace Hazardous Materials Information System (WHMIS).

Section 3 - Composition/Information on Ingredients

Substances

Revision Date: 11/April/2016
### Section 4: First-Aid Measures

**Description of first aid measures**

**Inhalation**
- **IF INHALED:** If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

**Skin**
- **IF ON SKIN:** Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. If irritation develops and persists, get medical attention.

**Eye**
- **In case of contact with substance,** immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.

**Ingestion**
- **First aid is not expected to be necessary if material is used under ordinary conditions and as recommended.**

**Most important symptoms and effects, both acute and delayed**
- Refer to Section 11 - Toxicological Information.

**Indication of any immediate medical attention and special treatment needed**

**Notes to Physician**
- Immediate medical attention after exposure to this material not expected to be necessary. No special treatment indicated related to exposure to this material.

### Section 5: Fire-Fighting Measures

**Extinguishing media**

**Suitable Extinguishing Media**
- Water, carbon dioxide, sand.

**Unsuitable Extinguishing**
- None known.
Media

Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards

- Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Hazardous Combustion Products

- No data available

Advice for firefighters

- Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters’ protective clothing will only provide limited protection.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions

- Ventilate the area before entry. Stay upwind. Do not walk through spilled material.

Emergency Procedures

- Contain spill and monitor for excessive dust accumulation. Avoid unnecessary personnel and equipment traffic in the spill area.

Environmental precautions

- No special environmental precautions necessary.

Methods and material for containment and cleaning up

Containment/Clean-up Measures

- Sweep up while carefully monitoring dust concentrations in the air or vacuum using vacuum equipped with a HEPA filter. Avoid creating dusty conditions whenever feasible. Assess situation and control potential explosion and exposure hazards. Place recovered wood dust in a container for proper disposal.

Section 7 - Handling and Storage

Precautions for safe handling

Handling

- No special handling precautions are required for products in purchased form. These products may release very small quantities of formaldehyde in gaseous form. Under foreseeable conditions of use, these products release less than 0.10 ppm in standard large chamber test conditions. Minimize dust generation and accumulation. Do not use in areas without adequate ventilation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Keep away from heat and ignition sources – No Smoking. Do not breathe dust. Avoid prolonged and repeated contact with the skin.

Conditions for safe storage, including any incompatibilities

Storage

- Keep container closed. Store in a cool, dry, well-ventilated place. Store away from open flame.

Section 8 - Exposure Controls/Personal Protection

Control parameters

### Exposure controls

**Engineering Measures/Controls**
- Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). It is recommended that dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen-deficient environment. Use only appropriately classified electrical equipment.

**Personal Protective Equipment**

- **Respiratory**
  - For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134. Use a NIOSH/MSHA approved respirator if exposure limits are exceeded or symptoms are experienced.

- **Eye/Face**
  - Wear safety goggles.

- **Hands**
  - Wear appropriate gloves.

- **Skin/Body**
  - Wear long sleeves and/or protective coveralls.

**General Industrial Hygiene Considerations**
- Handle in accordance with good industrial hygiene and safety practice.

**Environmental Exposure Controls**
- Follow best practice for site management and disposal of waste.

---

### Section 10: Stability and Reactivity

#### Reactivity

- No dangerous reaction known under conditions of normal use.

#### Chemical stability

- Stable under normal temperatures and pressures.

#### Possibility of hazardous reactions

- Hazardous polymerization will not occur.

#### Conditions to avoid

- Ignition sources, heat, chemical incompatibilities. Avoid open flame. Product may ignite at temperatures in excess of 400°F

#### Incompatible materials

- Avoid contact with oxidizing agents.

#### Hazardous decomposition products

- Spontaneous and rapid hazardous decomposition will not occur. Natural decomposition of organic materials such as wood may produce toxic gases and an oxygen deficient atmosphere in enclosed or poorly ventilated areas. Thermal decomposition (i.e. smoldering, burning) products include carbon monoxide, carbon dioxide, aliphatic aldehydes, resin acids, terpenes, and polycyclic aromatic hydrocarbons.

Potential Health Effects

Inhalation

Acute (Immediate) • Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible. Wood dust (generated from sawing, sanding or machining the product) may cause nasal dryness, irritation, coughing and sinusitis. Wood dust (generated from sawing, sanding or machining the product) may cause nasal dryness, irritation, coughing and sinusitis.

Chronic (Delayed) • Prolonged exposure to the dust may cause wheezing, chest tightness, productive cough nasal irritation and symptoms of chronic respiratory disease. Wood dust, depending on the species, may cause respiratory sensitization with prolonged, repetitive contact or exposure to elevated dust levels.

Skin

Acute (Immediate) • Exposure to dust may cause mechanical irritation. May cause skin sensitization. Symptoms include redness, and skin rash.

Chronic (Delayed) • No data available.

Eye

Acute (Immediate) • Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.
Chronic (Delayed) • No data available.

Ingestion
Acute (Immediate) • Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.

Chronic (Delayed) • No data available

Carcinogenic Effects • According to its Twelfth Report on Carcinogens NTP states, "many case reports and epidemiological studies (including cohort studies and case-control studies that specifically addressed nasal cancer) have found a strong association between exposure to wood dust and cancer of the nasal cavity. Strong and consistent associations with cancer of the nasal cavity and paranasal sinuses were observed both in studies of people whose occupations were associated with wood-dust exposure and in studies that directly estimated wood dust exposure." IARC has most recently concluded that "there is sufficient evidence in humans for the carcinogenicity of wood dust. Wood dust causes cancer of the nasal cavity and paranasal sinuses and of the nasopharynx."
