Stayton, Oregon
USA

The manufacturer listed above is certified under The Law Concerning Standardization and Proper Labeling of Agricultural Forest Products (Law No. 175 of 1950) – Date of Enforcement: March 1, 2006. The manufacturer has fulfilled TECO's requirements, as outlined in TECO's *Inspection and Certification Procedure –JAS* to manufacture certified Structural Laminated Veneer Lumber per Japanese Agricultural Standard MAFF Notification No. 701. The approved product is certified F 4-Star formaldehyde emission.

TECO operates a Type 5 certification scheme (IAF/ISO Guide 67) based on the following core processes:

- Qualification testing of the manufacturer's product for conformance with the applicable product standards;
- Qualification of the manufacturer's quality manual and assessment of the quality system;
- Ongoing auditing of the manufacturer's quality system at specified intervals;
- Periodic product testing.
