

Top Chord Bearing

When possible, locate bottom chord bearing clip at centerline support.

(1) Minimum support width equals A+B (2xA at bottom chord cantilever).

(2) Actual pin to end distance is based on forces in truss chord. Minimum cut-off may not be acceptable.

(3) Based on 2001 ND[®] minimum edge distance of 3.5D

(4) Pedestal clip geometry is dependent on the starter web angle and top chord slope.
