

SINGLE-MEMBER SIZING SOFTWARE

Specifying Made Simple

- Free download from RedBuilt.com
- Full-featured and user friendly
- Includes FloorChoice™ floor performance rating system

SPECIFYING MADE SIMPLE.

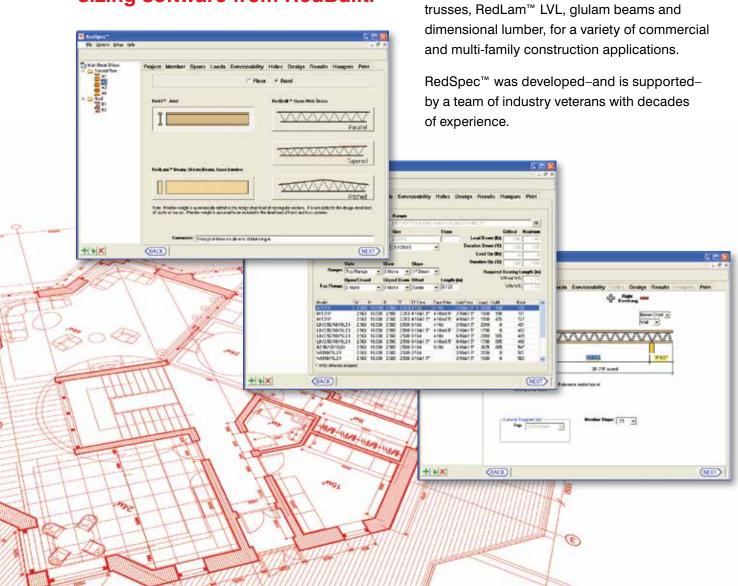

RedSpec[™] is a convenient, user-friendly design program that lets engineers and

and roof design specifications using Red-I™ Joists, RedBuilt™ Open-Web

architects quickly and efficiently create floor

Specifying RedBuilt™ products for your projects just got easier with RedSpec™ single-member sizing software from RedBuilt.

RedSpec[™] includes a suite of tools & features for your design needs.

Best Systems Analysis

Simple Tab-Driven Interface

Project Tree Folder

Solid Sawn Lumber and Glulam Sizing Capabilities

FloorChoice™ Floor Performance Rating

Integrated Hardware Selection

Hole Analysis

Quick and Convenient to Learn

Built-in PDF Printing

Intuitive Span Inputs

Multiple Live- and Dead-Loading Configurations

Local Technical Assistance

Gives you the ability to quickly narrow your product options and specify the most efficient solution

Provides an intuitive interface, allowing you to navigate through the entire workflow with a simple, logical, left to right design

Helps you keep your project calculations organized

Provides the convenience of using one wood design program

Allows you to recommend a system solution that better meets your client's floor performance requirements

Easily choose the hanger that meets your bearing requirements

Check how Red- $I^{\text{\tiny{M}}}$ Joists will perform with various holes cut in the web. Helps with coordination between trades.

Use the online video tutorials to make learning a breeze

Prints to common industry platform providing collaboration ease

Uses a graphic depiction of spans and bearings

Gives you the ability to apply uniform, tapered and concentrated loads

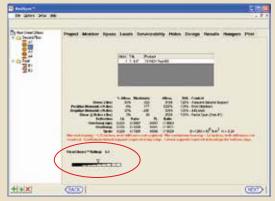

Your local technical representative is always ready to help you with your system selection

Floors have feelings, too. FloorChoice™ helps you understand them.

FloorChoice™ is RedBuilt's proprietary floor performance rating system that allows you to evaluate the floor while still in the design phase. FloorChoice™ provides a performance rating from 0 to 10, allowing you to determine if the floor–and the products specified in the system–meets the owner's expectations. The FloorChoice™ rating system is fully integrated into RedSpec™ product sizing software.

The FloorChoice™ rating system is the result of RedBuilt's vast industry knowledge combined with leading edge research in advanced floor vibration mitigation procedures. This easy-to-understand numerical rating is available only through RedSpec™ software and is the latest in the company's long history of innovations, spanning more than 50 years.
