

OUR TECHNICAL TEAM IS THE BEST OF THE BEST.

RedBuilt is a leading engineered wood products, structural components and construction systems supplier to the commercial construction industry across North America. Our reputation for unparalleled service and support goes back over 50 years.

And we're growing.

Summer Intern

We are currently seeking summer interns to support our engineered wood products commercial business. Interns will work under the direction of Professional Engineers and will be primarily responsible for structural analysis and product design using proprietary engineering software, producing and reviewing shop drawings and creating material lists. The job function also includes working directly with contractors, architects and engineers. Cross training opportunities exist in our industrial and corporate engineering functions.

There are openings for this position in Boise, ID, Chino, CA and Hillsboro, OR. Interns will report to the local Design Center Leader.

Qualifications

- Currently enrolled in a 4-year Engineering or 2-year Engineering Technology program.
- Framing experience is a plus.
- Able to read blueprints and other construction documents.
- Experience with AutoCAD or Revit.
- Capable of performing successfully in a team and individual environment in order to meet customer timelines.
- Able to establish and maintain excellent working relationships with customers, sales associates and the technical team.

If this sounds like you, we'd love to hear from you!
