

Structural Steel

FABRICATION FOR COMMERCIAL CONSTRUCTION

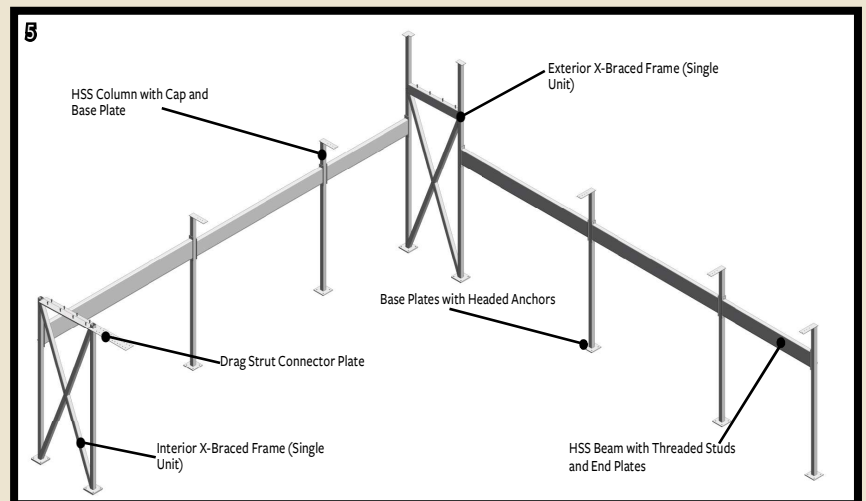

1. Metal roof decking
2. Round tube steel fabricated with base plates and buckets
3. Flitch column with RedLam LVL™, steel flitch plates and base plate
4. Steel stud wall with pre-installed blocking
5. BIM model of HSS structural frame with component callouts

Structural Steel fabricated by RedBuilt™ shortens lead times and minimizes complexities

- Simplify - Single-source material supplier for structural steel, RedBuilt™ open-web trusses, and RedLam™ LVL
- Reduce - Improve your process by streamlining supply chains for steel and wood/steel integrated components

A quality controlled manufacturing environment ensures a reliable product

- RedBuilt™ employs certified welders and performs a quality inspection process before material leaves the facility
- RedBuilt™ maintains project records for use in future remodels
