

# Prefabricated Wall Panels

**Unmatched in Experience. Driven by Innovation.**

Prefabricated wall panels represent a better way forward — combining speed, precision, safety, and cost efficiency into one ready-to-install solution.

**Red**BUILT™  
Prefabricated Wall Panels

# The RedBuilt Difference

RedBuilt is reigniting a passion for prefabricated construction. We continuously reinvest in technology, so you can realign your capabilities to meet evolving project demands, reimagine what efficient commercial construction looks like, and help your clients get a greater return on their investment.

## Speed of Construction

- Factory-built components arrive ready to install, significantly reducing on-site build time.

**Why it matters:** Faster build times reduce project risk and enables earlier occupancy.

## Reduced Labor Costs and Enhanced Safety

- Easy to install without specialized labor means smaller crews, faster coordination, and fewer injuries.

**Why it matters:** Simpler installation and a safer job site benefit contractors and owners alike.

## Improved Quality Control

- Consistent quality across every panel means no mistakes and less rework.

**Why it matters:** Reduced errors and cycle time help teams stay on schedule and on budget.

## Versatility Across Applications

- Prefabricated wall panels solve logistical issues in urban environments and reduce pain points in remote locations.

**Why it matters:** Regardless of the building type, or project location, RedBuilt wall panels are adapted to your project.

## Higher Energy Efficiency

- Precision manufacturing eliminates gaps and inconsistencies that compromise thermal performance.

**Why it matters:** A tighter building envelope supports energy efficiency and sustainability goals.

## Built For Your Project

- Each panel is custom-fabricated and optimized for your specific project.

**Why it matters:** Made-to-order means no on-site waste and efficient panel design for fast installation.

VS

## The Alternatives

### Built to Order

Optimized for your project, less waste

### Stick-Built

More material, more mistakes, more headaches

### Direct-to-Jobsite Delivery

Faster project timelines, fewer complications

### Complex Distribution

Adds supply chain risks and delays

### One-Source Support

Design through erection from our dedicated team

### Sporadic Support

Lack of ownership, multiple vendors, no answers

### Easy Installation

Kit of parts (erector set), no specialized labor required

### Labor Intensive

Skilled framers required throughout

# Design Applications

RedBuilt wall panel solutions support a wide range of commercial building types, including:

- Schools & civic buildings
- Industrial, data centers & warehouses
- Medical & community facilities
- Offices & corporate campuses
- Multi-family housing
- Hotels & hospitality
- Restaurants & retail

## A Nationwide Footprint, Ready to Deliver

With four design centers and four manufacturing plants strategically positioned across the country, we deliver the right solution on time and on spec.
